FOGSCREEN PROJECTION SCREEN

Using only tap water and ultrasonic waves, create a smooth foggy airflow that captures images just like a screen. You can walk right through a FogScreen projection screen without getting wet. The microscopic fog droplets feel dry to the touch. Needs only connection to a water source (long term use) or a water reservoir (short term use) and 1-phase 10A/230V or 20A/115V electricity. Available in two models, FogScreen Inia (shown left - 79" wide, 59" high) and FogScreen One (shown right - 39" wide, 59" high). Multiple Ones can be linked to form a seamless projection screen of any width. Also available, the FogScreen Interactive Add-on includes scanner and software necessary for reading on-screen movement which allows you to write and draw in the air, operate a computer by just touching the air or create interactive kiosks. Customized interactive software can also be designed. Call for pricing.
